Career objective

Motivated Full Stack Java Developer (Fresher) with hands-on experience in Core Java, Spring Boot, React.js, REST APIs, and MySQL. Seeking an entry-level opportunity to contribute to scalable and user-friendly web applications.

Technical skills

- **Languages:** Java (Core Java, OOP, JDBC, Exception Handling, Collections)
- **Backend:** Spring Boot, REST APIs
- **Frontend:** React.js, React Hooks (useState, useEffect, useContext), HTML, CSS, JavaScript, SPA
- **Database:** MySQL (CRUD operations)

Professional training

Full Stack Java Development, QSpiders, Vadapalani (6 months)

Project

HR Management System | Spring Boot, React.js, MySQL

- Developed a full stack HR Management System for employee record management.
- Built the backend with Spring Boot, RESTful services and CRUD operations.
- Designed the frontend as a Single Page Application using React.js and Hooks.
- Integrated the MySQL database and tested APIs using Postman.
- Code: github.com/sharu4624/hr-management-system
